# Erratum to: Cost-effectiveness of clostridial collagenase ointment on wound closure in patients with diabetic foot ulcers: economic analysis of results from a multicenter, randomized, open-label trial

Travis A. Motley<sup>1</sup>, Adrienne M. Gilligan<sup>2,3\*</sup>, Darrell L. Lange<sup>2,4</sup>, Curtis R. Waycaster<sup>2,3</sup> and Jaime E. Dickerson Jr<sup>2,5</sup>

## Erratum

Following publication of the original article [1] it was brought to our attention that some of the data within the article required correction.

Hence, please note that in the second paragraph of the section headed 'Three-state markov model and transition probabilities' there is a sentence which reads as:

"At the end of 12 weeks, approximately 65 % of patients in the CCO + SSD group were considered healed compared to 47 % in the Control group."

However, this should read as:

"At the end of 12 weeks, approximately 47 % of patients in the CCO + SSD group were considered healed compared to 32 % in the Control group."

This alteration does not affect the methodology or results.

Submit your next manuscript to BioMed Central and we will help you at every step:

- We accept pre-submission inquiries
- Our selector tool helps you to find the most relevant journal
- We provide round the clock customer support
- Convenient online submission
- Thorough peer review
- Inclusion in PubMed and all major indexing services
- Maximum visibility for your research

Submit your manuscript at
